I had Patrick's email backwards on the last email. This should work!

Hi Lisa,
The data, as you know, is posted. As I said on the phone, Patrick Wilson is happy to speak with you about the test results from your office and what they mean. I believe you have his number, but I've copied him on this email so that you can easily contact him.
Sandy

Subject:

Hello Sandy,

I appreciate you calling to inform me about the PCB level in the PE office area but am confused by your statements stating that the levels were lower then the first round of PCB testing, and specifically room 1 (bridgette's room) . I have added the total PCB's found in the room and calculated the levels to be far higher then Bridgette's room. In fact, I have found them to be 96.7. I find this number totally unacceptable and do not want to work in these conditions. Can you please check the data again and confirm to me the exact number that you are believing my office to be at.

Thank you,

Lisa Lambert
